

ARE YOU EXPERIENCING ANY OF THESE SYMPTOMS?

Patients are commonly misdiagnosed as pneumonia, as there are several similar symptoms. Most patients report flu-like symptoms that usually go away after a few weeks. Other symptoms include:

- Fatigue
- Fever
- Headache
- Cough
- Shortness of breath
- Night sweats
- Muscle aches or joint pain
- Rash on upper body or legs

TALK TO YOUR DOCTOR ABOUT THESE AVAILABLE TESTS.

Early detection and accurate diagnosis are critical for improved outcomes. MiraVista Diagnostics offers several testing options for accurately detecting Valley Fever.
